Maintain Security  
Alarm Monitoring  
to Properties

Provide Onsite  
Licensed &  
Trained Security  
Officers

Robuck Security has been in operation for over 40 years and is a Victorian based family owned and operated national company.

Throughout the years, the industry has changed, but our policy remains the same as always, "Service, Service and Service". In today's competitive market, the price differential of one Security Company to another is usually very small, so the objective is to obtain the very best service possible for your dollar.

Robuck is a medium sized company with the impact and capabilities of a larger provider whilst retaining an old-fashioned level of service and accessibility to our clients. We are committed to never growing so big that we cannot continue our present, high level of service to current or new prospective clients. It is extremely important to deal with a person you know, and have the knowledge that you as our client are highly valued. At Robuck, our most important asset is our client. When you talk to us at Robuck, you will be talking to a person you know.

Robuck Security is an accredited company to ISO 9001 standard. Robuck has the enviable reputation of still retaining the old fashioned caring attitude, whilst utilising modern technology and keeping abreast of current trends and practices.

## Connecting Your Business to the Electronic Resources You Need.

Robuck Electronics specialises in the supply and installation of Intruder Detection and Surveillance Systems right across Australia. Whether it's a single/chain of stores, or large commercial premises such as a factory, shopping centre or corporate high rise building, we can design a system to suit your needs.

At Robuck Electronics we are not contracted to any specific brand of equipment so we can offer you the best and most appropriate system to suit your business needs. We design our systems to be robust and easy to use to encourage continual usage.

## Security Solutions for your business needs

*Robuck Security can provide an integrated security solution*

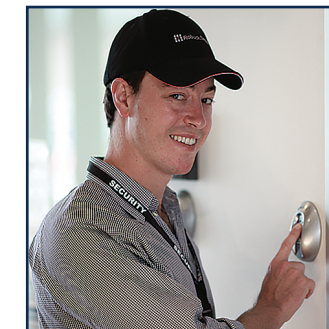

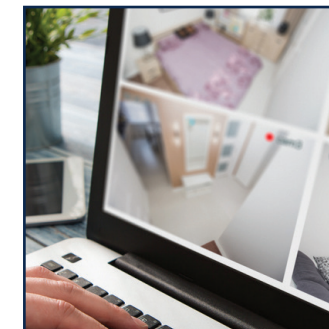

### BENEFITS OF SECURITY

Security is a business driver (enabler), it is a principle that has stood the test of time. A business with a structured and properly managed security system appropriate to the risks will more likely prosper, than a business that neglects these risks. Security provides both tangible and intangible benefits to a business.

### SERVICES

- Corporate Security Service
- Static Guard Services
- Risk Assessment & Management
- Investigations
- Mobile Patrol Services
- CCTV Systems
- Access Control
- Alarm Systems
- Alarm Monitoring
- Corporate GPS Fleet Mngt
- Personal Duress Devices

We have an Australia wide support network to not only install new systems but maintain and service systems once they are installed. A key strength our after sales service and responsiveness to client matters, along with our ability to provide alarm monitoring, and if needed alarm response.

We are an approved supplier to many government departments who have security system requirements greater than the Australian Standards.

For a more detailed obligation free discussion about your potential or current security system requirements please call our Electronic Security Consultants.
